

Learner's Guide for the Android Settings Web App (ASWA)

What is this guide?

This guide contains all exercises and detailed steps to perform them related to the review of **The Android Settings Web App (ASWA)** for the Android Level 1 academy. Please perform each of the exercises when prompted to by your instructors

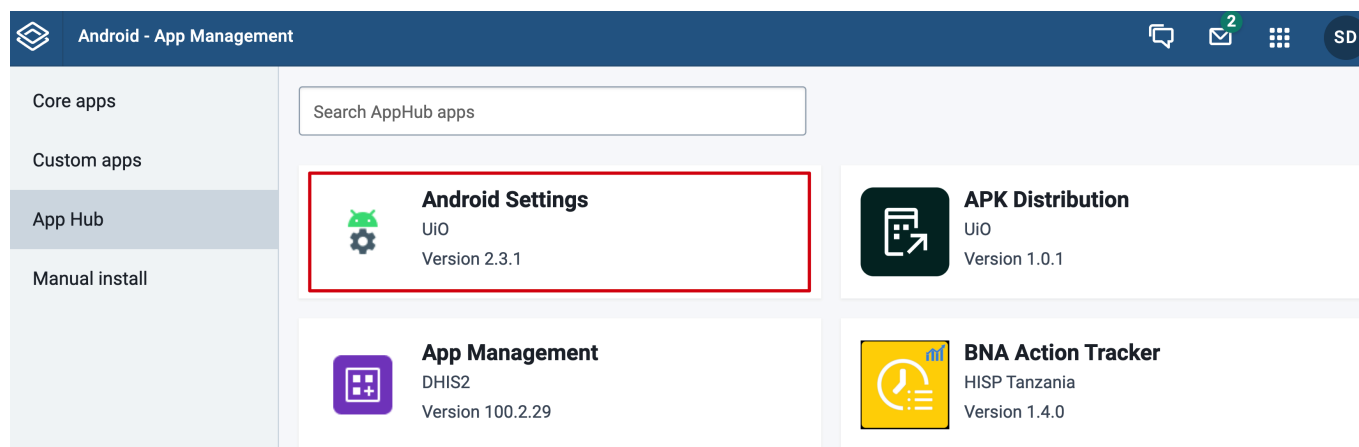

Learning objectives for this session

- Demonstrate how to Install the Android Settings Web App
- Describe how to navigate through the Android Settings Web App
- Demonstrate how to alter the appearance of the programs and data sets using the the Android Settings Web App

Exercise 1: Installation of the Android Setting Web App

To use the Android Settings Web App you need to first install the app by going to DHIS2 web interface

- Go to Search Bar and Search for the App Management app
- Go to the app hub
- Click on Android Settings
- Install the Android Settings App

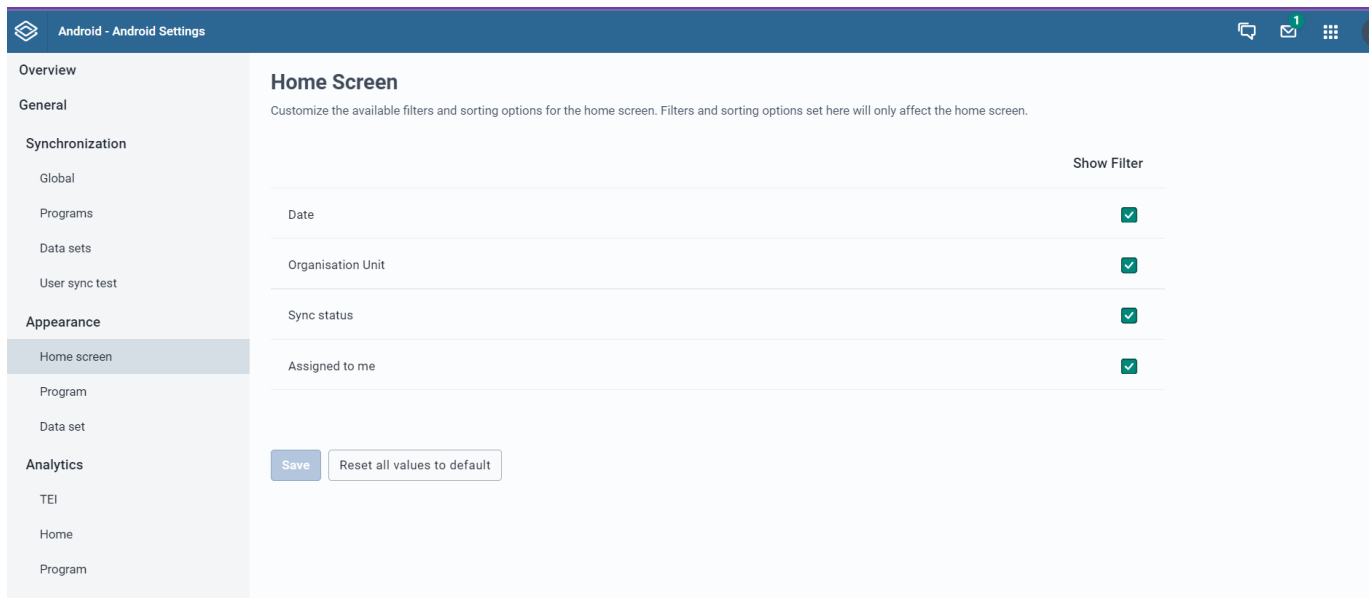

STOP : End Exercise 1

Exercise 2: ASWA Home Screen Settings in the Appearance Section

This section allows the admin user to enable or disable the option to show the filters related to Date, Organisation Unit, Sync Status, and Assigned to me on the Home screen.

In the current setup you can see all of the options are enabled.

- Disable the filter Assigned to me and Save.

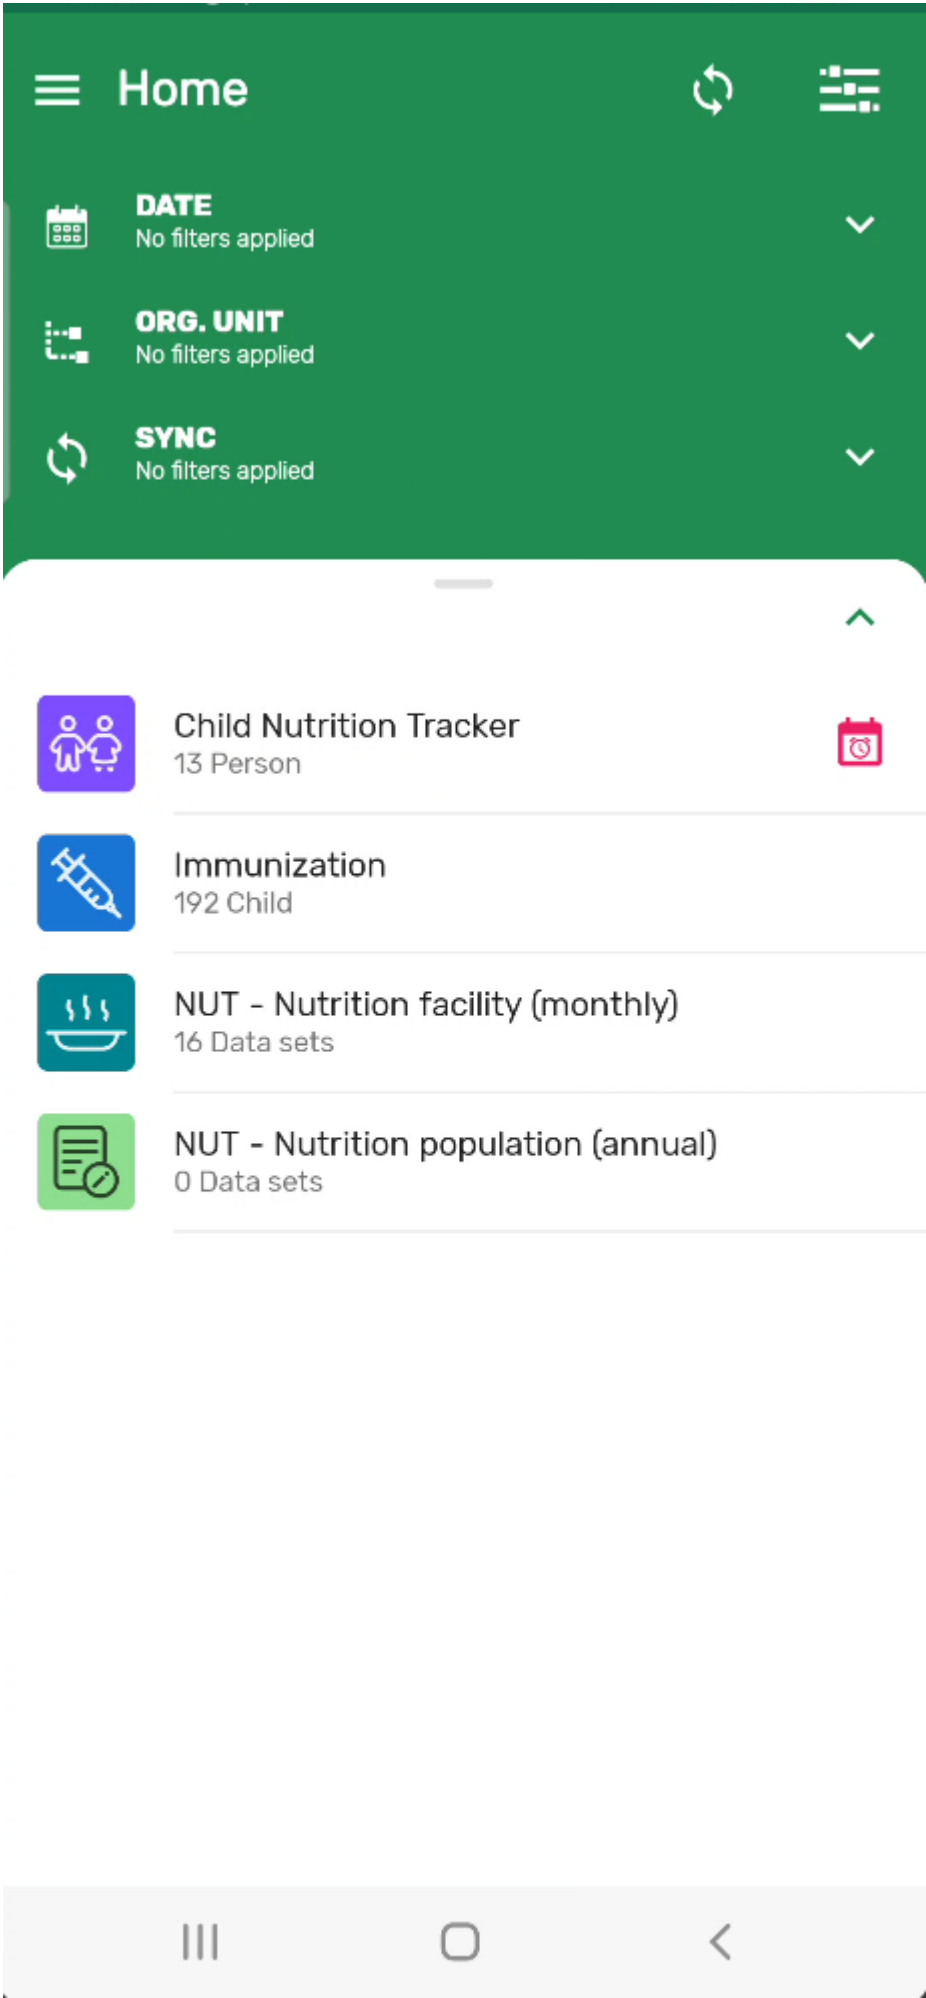

Home Screen

Customize the available filters and sorting options for the home screen. Filters and sorting options set here will only affect the home screen.

	Show Filter
Date	<input checked="" type="checkbox"/>
Organisation Unit	<input checked="" type="checkbox"/>
Sync status	<input checked="" type="checkbox"/>
Assigned to me	<input type="checkbox"/>

SaveReset all values to default

- Now Go to the Android App and sync your changes (make sure you go to Settings -> Sync Configuration now, to sync the changes that were done in the Android settings web app)
- Now go to the Home Screen. You will see the below screen with only the Date, Org Unit and Sync options in the filter.

STOP : End Exercise 2

Exercise 3: Program Settings in Appearance Section

The Program appearance section allows you to hide/show features within the program according to the configuration needs. These changes can happen globally, applying to ALL the programs or can alternatively be applied to a SPECIFIC program.

Global Settings

Percentage (%) complete in Program: Enable or disable the option to show the completion percentage of the data entry form.

TEI referrals: This allows you to switch off/on the TEI referral option.

Collapse sections in form: The Current behavior lets the sections collapse and expand in an accordion style. This option overrides the behavior by keeping all the sections of the form (registration and events) open and removing the "next" button in each section.

For this session you can

- Disable "Show percentage (%) complete in Program toolbar"
- Go to Android Device to check the changes.
- Make sure you perform Synchronization by going to Settings < Sync Configuration
- Show the enrollment Screen to see the changes.

Program

Customize filter and sorting options available for programs. Settings below apply to all programs a mobile user has a

Global settings

☐ Show percentage (%) complete in Program toolbar

☐ Disable TEI referrals

Save Pro

TEI without searching: Offer online and offline search, as well as allowing the user to create a TEI without a prior search.

TEI Header (**New 2.3.1**): Assign a specific attribute or expression that will be displayed as a header in TEI cards.

Note:*A notice box will be displayed if the selected program lacks expressions related to program indicators that are valid for Android.*

If any specific settings have been saved, a table will summarize the particular configuration per program, and the options to edit or delete these settings.

Save Pro

- Save the program

To test this you need to log back into your android device and Sync your configuration

- Go to the Immunization program and you should be able to create a TEI without searching

STOP : End Exercise 3

Exercise 4: ASWA Data Set Settings in Appearance Section

The data set settings allow you to customize filter and sorting options available for data sets.

- Settings can apply to all data sets a mobile user has access to.
- Settings specific to individual data sets can also be applied.

Global settings

The first part is for global settings that apply to all data sets an android user has access to.

Data set
Customize filter and sorting options available for data sets. Settings below apply to all data sets a mobile user has access to. Settings specific to individual data sets can also be applied.

Global settings

Show Filter

Period	<input checked="" type="checkbox"/>
Organisation Unit	<input checked="" type="checkbox"/>
Sync status	<input checked="" type="checkbox"/>

In this section you can disable Sync Status filters from the Global Settings and Perform the same steps as above to see the changes in the Android device.

Global settings

Show Filter

Period	<input checked="" type="checkbox"/>
